

## ALLEN OSLH MAINTENANCE /MODERNIZATION

We would like to greet you with a warm heart and a hearty handshake. There have been a lot of activity regarding the stimulus project, many work orders, and building handicapped ramps for cluster housing tenants. It seems summer has gone by fast and we must start preparing for winter. The children are back in school and it seems a little colder already. Furnaces will have to be repaired and maintained.

The stimulus project has begun in the Pass Creek District and is moving along quickly. The roofs on several houses are being prepared for metal roofs and is quite exciting for every one. The metal roofs, the total, and the partials renovations will greatly be appreciated here in the Pass Creek District.

The Allen maintenance workers and staff are a very dedicated crew who work together to try to enhance the quality of living conditions for our tenants. The Allen maintenance workers have installed two handicapped ramps and is working on a third ramp for a tenant who is on dialysis. The commitment to the tenants of Allen is strong.

The lawns in the Allen Cluster housings are all cut and it looks real nice thanks to the dedication of the Pass Creek District CAP workers and the summer youth workers. The Allen TSR has helped put in 20 individual gardens and the gardens are showing signs of a good harvest.

We here in Allen feel we are one of the nicest looking districts on the Pine Ridge Reservation and will maintain that attitude while continuing to do our job to it's fullest.
